

# The Eye Site of Bluffton

The Eye Site of Bluffton is pleased to offer you highly advanced technology available in eye disease detection, the Nidek Retinal Imaging Camera.

Dr.'s Switak and Szypczak are concerned about retinal diseases such as macular degeneration, glaucoma, retinal detachments and diabetic retinopathy: which can lead to partial loss of vision or blindness. Additionally, systemic diseases such as diabetes and high blood pressure can be detected with a retinal examination. Eye exams with retinal evaluations can help you safeguard both your eyesight and general health.

We strongly recommend that all patients have this procedure performed annually. It is especially important for people who have a family history of, or currently have:

- Diabetes
- Cancer
- High Blood Pressure
- High Cholesterol
- Macular Degeneration
- Retinal Detachments
- Glaucoma
- Headaches

**Healthy**

**Diseased**

\_\_\_\_\_ YES, I elect to have a Retinal Photograph performed today

\_\_\_\_\_ NO, I decline to have a Retinal Photograph performed today.

With an annual retinal photography your Doctor can track your eye health for concerns, comparison and treatments. Medical and Vision Insurances do not pay for routine photos, there is a \$39 for the procedure.
